

### **Environmental Policy Statement**

The Directors and Management of OCL Regeneration Ltd are committed to:

- Promoting the use of sustainable construction materials
- Operating the business whilst minimising the impact on the environment
- Ensure that we are compliant and committed to our legal and regulatory obligations
- The setting and management of environmental objectives and targets to improve the company's environmental standing and commitment
- Agree that environmental performance is the responsibility of all personnel and that sufficient environmental awareness will be promoted amongst the workforce and any contractors that they may instruct.
- Subscribe to the philosophy that all environmental incidents and pollution are preventable
- Ensuring that, throughout the development of any operation and process, environmental issues are on the agenda from the planning stage.
- Environmental factors can and will be addressed in all business decisions.

**The Company will also, so far as is reasonably practicable, ensure that resources are allocated to:**

- Regularly reviewing its policies and procedures to ensure ongoing suitability and continual improvement.
- Ensuring that all personnel are trained and achieve competence to a level appropriate to their position and the potential environmental consequences of their role
- Effectively communicating details of this policy and the environmental management system to all personnel and contractors

Issue 5 February 2025
